C  **MPASS**
WINDOW SERIES
brought to you by Vista

Custom-made windows
and doors designed for
you and your home.

With the Compass Window Series, you can be sure that the beauty of your windows last you a lifetime!

COMPASS WINDOW SERIES

By combining Super Spacer's "True Warm Edge" spacer system with Cardinal LoE³-366 glass and foam-filled sash and frame*, we have created a window that provides the energy efficiency you need, all within the budget you want.

	3/4"	1"
	Low-E / Argon / Clear	Low-E / Argon / Low-E / Argon / Clear
U-Value	.27	.22
R-Factor	3.70	4.55
VL	48%	34%
SHGC	.21	.16
CRF	60	68
ENERGY STAR	All	All

† Based on overall values of a double hung window with double strength glass and no grids; actual U-Values may vary based on window configuration.

Compass By-The-Numberst

Super Spacer[®] Spacer System

- Lowers energy costs while adding lasting durability, comfort and value to your home
- Multi-layer vapor barrier provides excellent gas retention
- Enhanced condensation resistance for overall window improvement and reduced chance of mold
- Health Smart Advantage[®] allows for higher humidity and less bacteria growth
- Spacer flexes with temperature changes to limit the possibility of seal failure
- Structural foam spacer contains no metal for superior insulating performance

Cardinal LoE³-366[®] Glass

- ENERGY STAR[®] compliant in every zone
- The ultimate performance glass with energy savings throughout the year, all with exceptional visibility
- Three layers of silver provide energy efficiency, decreased heat gain, all while resisting interior fading

What is Neat[®] Glass?

- Naturally clean glass that harnesses the sun's UV rays to loosen dirt so water can rinse it away, leaving windows virtually spotless
- Titanium dioxide layer of Neat glass reacts chemically with the sun's UV rays, causing organic materials that are on the glass to decompose and be rinsed away with the rain
- Thin layer of silicon dioxide makes Neat glass exceptionally smooth, allowing water to "sheet off" and evaporate quickly, greatly reducing water spotting

Foam-Filled Sash & Frame

By filling selected cavities of each part of the frame and sash with foam, we enhance the thermal efficiency of the window compared to windows

* Foam-filled sash & frame is currently only available on double hung and slider windows.
